

HOW TO MAKE YOUR WIKIPEDIA + LIBRARIES INSPIRATION FINDER

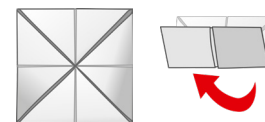

1. Fill in eight fortunes in the blank spaces.
2. Cut out the square to the left.
3. Place your Inspiration Finder print-side down and fold the four corners to meet in the middle.

4. Flip paper over and fold the new corners to meet in the middle.

5. You should still have a square. Fold the square in half to make a rectangle.

6. Place your thumbs and fingers underneath the flaps to operate.
